

I work with local groups of small merchants through the Chamber of Commerce, down town associations, or create a new Co-Op organization. These organizations can provide this service for you but they are too busy fulfilling their needs to be a service like this to you. I do allow some Franchises but I do not allow the likes of Wall-Mart, Target, CVS, Best Buy, Lowes, or any company that puts a tiny amount of money into a town but takes a large amount of money out of a community and sends it to China or some foreign country that doesn't even like us. Now if you fit into a group that lives, owns and works with your small business, in a local community here is how I can help you.

MY COST: We can get that out of the way right up front. I need a minimum of 10 local merchants that show an interest in this program then I will sit down with you as a group and explain. Then if you all want to do some business I charge \$100 flat rate per merchant after the program has been set up and ready to activate online. If you do not have a website already I can make you one starting at \$250. (That does not include an eCommerce site,) Every thing else past that point is cost shared or Co- Operative.

I am currently looking for small local owned businesses, in Southern Louisiana, with websites to pledge a one time (\$10.00 pledge) and I will start a major online ad with all the major search engines. See News letter #1.

Here is how I help any small business

1. I create one main web site which is a local business search engine.
2. Then I advertise that site on Local TV, Radio, Bumper stickers, Newspapers, bill boards, Google, Yahoo and MSN Local, bulk mail, any and everyway possible to advise local shoppers about your business. Most small businesses do not have the money to really advertise their business. Ex: A 30sec commercial of your business on TV cost you \$5,000 what I do is get you and 9 more local merchants or even 100 to chip in and pay that cost, I advertise one single site to direct shoppers to your individual business.
3. It is that simple and I keep things simple and affordable.
4. **I AM ALL ABOUT RESULTS: I take no deposits. I accept no money until my projects** are finished and all of you are 100% satisfied with the finished product. That is why I have over

35,000 references in the southeast.

5. Get a min of 10 fellow merchants together and I will come and explain this co-op program to you and explain all the works. NO COST. Should you decide to do business with me, I will live and stay in the area until my work is completed to your satisfaction. Then I will give you a bill and put it online, then you pay me, it is that simple and no need for contracts. "Yes, I can update anything at anytime."

Now somebody somewhere just said "Well I have a website and it is not doing anything for me." Well

when was the last time you put some time in on your site? A website is just another employee, you have to teach it, you have to work with it. I mean you literally, you cannot hire me or anyone else that

understands your business better than you. In other words I will teach you to be my competitor. But if

you teach an employee all that you know, he or she will become your competitor. A website won't do that.

If you are in retail sales this is a way for you to compete with the wall marts and targets. You and I

know you have a better product and service. If you are in a service business you may not want more

work. But if you want to grow and hire more people. I can help you do that. Or maybe you just want to

get rich quick; well I CANNOT help you, go somewhere else for that. That only works for politicians

with a great lie and other crooks.
